

ReCor Medical

Ultrasound Denervation Therapies

Pre-Clinical Scientist

Department: Medical Affairs

Reporting to: Manager, Pre-Clinical Research

Location: Palo Alto

About ReCor Medical

At ReCor Medical, we are pioneering Ultrasound Renal Denervation (uRDN) therapy to treat hypertension, the leading cardiovascular risk factor in the world. With our Paradise™ uRDN System, we're on a mission to provide the millions of people who suffer from hypertension with a non-drug and minimally invasive option to lower their blood pressure safely and effectively. Join us on our journey and make a meaningful impact on the lives of people around the globe.

Position Summary

The Pre-Clinical Scientist will join the Medical Affairs Team with the responsibilities of supporting the design, conduct, and analysis of preclinical studies for the current and next generation technologies. The position requires a strong understanding of anatomy, physiology, and medical devices. Critical thinking, report writing skills, strong data analysis skills, and collaborative skills are required. The Pre-Clinical Scientist will work closely and collaboratively with the Medical Affairs team, R&D engineers, and other cross-functional teams on preclinical related tasks to further enhance our current technology and future next generation technologies.

Responsibilities and Duties

- Responsible for supporting the design and conduct of pre-clinical studies to support next generation technologies through close collaboration with the R&D engineers and ultrasound scientists.
- Responsible for supporting the generation of preclinical protocols, data analysis, and study report writing.
- Responsible for contributing to team discussions and planning of therapy optimization, therapy innovation, and confirmation of our therapies.
- May contribute to manuscripts on preclinical data.
- Position requires cross-functional collaboration.
- Required travel to contract research facilities and support preclinical studies (up to 25% travel).

Requirements

- Minimum of a Bachelors' degree in a health-related, or other scientific discipline with 5 years of experience, or Masters' degree +3 years of experience, or Advanced degree (MD, DVM, PhD) with limited experience.
- Prior medical device or cardiovascular device industry, preferred.
- Prior experience with non-clinical models required.
- Strong background in biology, tissue interactions, data analysis, and study report writing.
- Strong verbal and written communication skills.
- Works well within a cross functional team.

ReCor Medical

Ultrasound Denervation Therapies

Salary Range: \$110K - \$130K (Commensurate with experience, skills, education and training)

COVID-19 vaccination requirements

At ReCor Medical, we care, we collaborate, we challenge, and we create. Pursuant to these core values, we are focused on the health and safety of our employees, as well as the teamwork essential for innovation of our pioneering technology.

COVID19 vaccines are required for all ReCor US office employees effective June 10, 2021, as well as all new US office employees joining our company. Fully vaccinated persons are those who are ≥ 14 days post-completion of the recommended series of an FDA-authorized COVID-19 vaccine.

Equal Employment Opportunity

At ReCor Medical, we value bringing together individuals from diverse backgrounds to develop new and innovative solutions for patients. As an equal opportunity employer, we do not discriminate on the basis of race, color, religion, national origin, age, sex (including pregnancy), physical or mental disability, medical condition, genetic information gender identity or expression, sexual orientation, marital status, protected veteran status, or any other legally protected characteristic.
