

ReCor Medical

Ultrasound Denervation Therapies

Business Systems Analyst – Clinical Research

Department: Clinical Affairs

Reporting to: Senior Manager, Clinical Business Systems

Location: US

Workplace Type: Remote

About ReCor Medical

At ReCor Medical, we are pioneering Ultrasound Renal Denervation (uRDN) therapy to treat hypertension, the leading cardiovascular risk factor in the world. With our Paradise™ uRDN System, we're on a mission to provide the millions of people who suffer from hypertension with a non-drug and minimally invasive option to lower their blood pressure. Join us on our journey and make a meaningful impact on the lives of people around the globe.

Position Summary

The Business Systems Analyst is a key member of the Clinical Data Systems team and is responsible for deploying, configuring, and implementing validated technology systems. As the subject matter expert, he/ she will be responsible for implementing and post-implementation support for clinical technology solutions.

Responsibilities and Duties

- Responsible for the implementation and ongoing support of clinical applications
- Identify gaps between business needs and technical capabilities; work to find innovative solutions that meet business objectives or create new business opportunities
- Create user documentation and train personnel on applications /reports /solutions, as required
- Represent the needs of the clinical affairs team to the solution vendor(s)
- Manage upgrades and enhancements to existing clinical applications
- Participate in GxP validation/qualification of systems, including writing, reviewing, and executing validation protocols
- Communicate support issues, solutions, and progress to stakeholders
- Perform other duties as required

Requirements

- Demonstrated technical understanding of application architecture to include application servers, web servers, configuration files, relational databases, SQL, and reporting applications
- Proven knowledge of clinical system solutions and application management through various product cycles and business environments
- Previous experience supporting one of the following solutions: Clinical Trial Management Systems (CTMS), electronic trial master file (eTMF), electronic data capture (EDC), imagings, or RSTUDIO.

ReCor Medical

Ultrasound Denervation Therapies

Education Requirements

- Minimum of five years experience with a bachelor's degree in Computer Science, Engineering, or related discipline

Preferred Requirements

- Experience with R, Python, JavaScript, SQL, or SAS
- Familiarity with biotech/pharma business processes and applications
- Familiarity with GxP and ICH regulations and 21CFR, Part 11

COVID-19 vaccination requirements

At ReCor Medical, we care, we collaborate, we challenge, and we create. Pursuant to these core values, we are focused on the health and safety of our employees, as well as the teamwork essential for innovation of our pioneering technology.

COVID19 vaccines are required for all ReCor US office employees effective June 10, 2021, as well as all new US office employees joining our company. Fully vaccinated persons are those who are ≥ 14 days post-completion of the recommended series of an FDA-authorized COVID-19 vaccine.

Equal Employment Opportunity

At ReCor Medical, we value bringing together individuals from diverse backgrounds to develop new and innovative solutions for patients. As an equal opportunity employer, we do not discriminate on the basis of race, color, religion, national origin, age, sex (including pregnancy), physical or mental disability, medical condition, genetic information gender identity or expression, sexual orientation, marital status, protected veteran status, or any other legally protected characteristic.
